## USE AND MAINTENANCE OF BUBBLE COVERS

### TREATMENT

#### Monitor regularly and keep water clean, healthy and balanced:

- Operate the filtration system
- Obtain the right balance between acidity (pH), hardness (TH), alkalinity (TAC) and levels of disinfectant
- BULPI® and OXO® protect your water, meaning you use up to 40% less treatment products.

#### In case of shock-treatment (chlorine, bleach, acids, salt)

- Take the cover off and replace only when the water is stabilised.
- In case of direct contact with product, rinse immediately in clean water.

BULPI® and OXO® mean you have less pool cleaning, due to much lower contamination by debris and algae development, according to the range.

✗ Lack of maintenance will lead to premature ageing and discolouration.

#### Monitor water temperature

- When water temperature reaches 30°C or over, do not leave the cover on the pool during the day, as this causes the bubbles to overheat.
- BULPI® and OXO® help maintain water temperature and, according to the range, can also help increase water temperature (by up to +8°C).
- BULPI® and OXO® reduce water evaporation by 98%.
- In windy conditions, leave the cover on the pool, this will prevent evaporation and rapid cooling.

✗ Treatment errors can lead to delamination and blistering.

## POSITION AND SAFETY

- Always position the bubbles in contact with water.
- Do not walk, lie or jump on the heat cover.
- Do not swim under the cover.

## STORAGE

### Avoid overheating when out of water

- Roll the bubble cover up and keep it out of direct sunlight, if you have a roller system, please use a protective cover.
- Do not sit on the rolled up bubble cover.
- In storage, do not put pressure on the cover.
- ✘ Incorrect storage can lead to broken or bulging bubbles.

## AT THE END OF THE SEASON:

- The heat cover should not be used as a winter cover.
- Rinse the cover in clean water to remove chemical residue.
- Dry and place in storage packaging.
- Store in a dark, dry place.

*Follow these instructions to optimise the bubble cover's service life.*

*If the instructions are not followed, the guarantee will be void.*
